CaseWorX Release Notes

Version: 3.5.0.76

New Functionality:

- Combining entering and posting payments

    o Combines the steps of entering a payment and posting the payment so the user enters the payment and applies the payment to the needed account(s) in the same window

- Receipt pop-up for payments is configurable

- Bulk Financial Widget

    o New Program Management widget that allows the user to enter payments, charges, and credits for multiple participants in the same location.

Fixes:

- Date Format – returning the date format to the traditional MM/DD/YYYY format

- Duplicate records on Ad Hoc Calendar/Docket report

- Users not displaying in Administration

- Posted List Report – fix for user selection display

- Voiding payment required when editing or deleting a record

- Restoring document access in Drug Screen widget
