

WHAT IS MYCIDS?

MYCIDS stands for **M**ississippi **Y**outh **C**ourt **I**nformation **D**elivery **S**ystem.

MYCIDS is a system for the real time management of the activities of the Mississippi Youth Court System. It is a web-based application that provides support for the intake of youths into the court system, scheduling of youth cases, management of court dockets, tracking of custody situations, necessary document generation and also provides a base dataset for statistical reporting purposes.

MYCIDS closely monitors the scheduling activities to make sure that the youth is treated according to the law. The system is designed to support the Youth Court staff in the decision making process by providing rapid access and visibility to information shared in a common information repository.
