

CaseWorX Release Notes

Version: 3.5.0.108

Release Date: September 24, 2021

Enhancements:

- **Participant Transfer** - This feature will allow you to transfer participants from one court to another court within the same website. The transfer will occur from the phase movement widget, and the sending court will select the court to which the participant will be sent. The receiving court will accept the participant from the transfer queue and will select the widgets from which it would like to receive participant data.

- **Participant Number Editable** - This feature will allow the user to edit the participant number and will also perform a duplicate check to make sure that the edited participant number is not a duplicate of any other participant in the system.

- **Additional Participant Number** - Field in the Participant Information widget that allows the court to store an additional participant number.

- **Financial Receipt Fields**
 - o All receipts will now display an auto-generated System Transaction date to document the date the transaction was entered into the system.
 - o Receipts for posted payments will display the balances for the accounts to which the payment was posted.
